(54) Title: LAMINATE WITH FILL LAYER

(57) Abstract: A laminate has alternating metal layers and at least one plastic bonding layer. The metal layers each comprise at least two metal layer sections that have mutually overlapping edges bonded to one another. To even out the differences in thickness, a fill is provided which has at least a thickness such that at the location of the fill the laminate has a thickness equal to the thickness at the location of the overlapping edges.
